

# Business Process Management & Data Management →

# BPM+

## inubit Suite 6

- ▶ Unique approach to unify process and data management
- ▶ New collaborative web-based modeling
- ▶ Support of Process Maps
- ▶ Incremental generation of executable workflows
- ▶ Support of IBPM modeling patterns
- ▶ Increased execution performance up to 50%

## New component: inubit Solution Center

- ▶ Rapid development of human- & data-centric business solutions
- ▶ Support of semi- and unstructured processes
- ▶ View pattern library according to IBPM
- ▶ Web-based configuration of Domain Models & Interaction Views
- ▶ Dynamic reconfiguration of models & views
- ▶ Support of data federation from arbitrary 3rd party systems
